May 10, 2024

To Whom It May Concern,

I would like to recommend Sumayyah Ahmed as an excellent candidate for employment in the computer and information science field. Sumayyah has shown incredible adaptability, academic ability and problem-solving skills since her first semester at in college in 2021, and she is ready to apply those skills in the STEM workforce.

For the past three years, Sumayyah has been dedicated to learning as much as she can about computer and information science, going above and beyond full-time enrollment by taking an astounding 19-24 credit hours each semester. She is able to absorb, analyze and apply course material efficiently and intelligently, which can be seen in her excellent grade point average. Sumayyah is an expert in time management, prioritization, problem-solving, efficiency and self-discipline.

I am confident Sumayyah can apply all of her talents to an employment role and be a remarkable contributor to company projects. She has successfully completed group projects for her classes, is a proficient independent worker, and is prepared to tackle a new project in any form. Sumayyah's versatile skills will allow her to quickly overcome the learning curve, critically analyze project specifications and help advance the desired outcomes. She would be an asset to any team.

Thank you for considering Sumayyah for your employment opportunity.

Sincerely,

Susan Fenwick
